

# SYNERGY POWER™

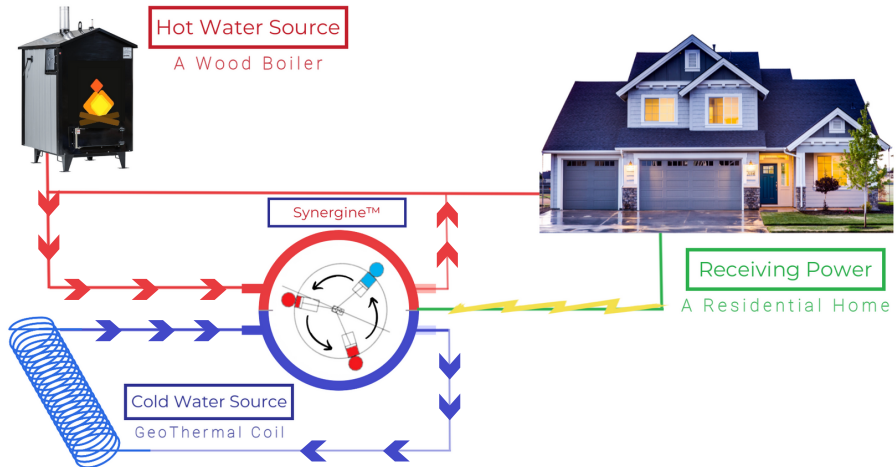

[www.SynergyPowerLLC.com](http://www.SynergyPowerLLC.com)

Providing clean, affordable  
energy for everyone from low  
temperature heat sources  
available everywhere.

## The Opportunity

Trillions of BTU's are being unused, and there is nothing else on the market that is so capable to use them like the Synergine. The Synergine is the best solution to bring clean, reliable and non-weather reliant power to all ends of God's Great Earth.

## One of many applications for the Synergine

## The Synergine

The Synergy Power Synergine has been thoroughly proven in theory, design, and application. It is ready for mass market implementation. The Synergine can be built, delivered and installed in a matter of weeks for your specific needs.

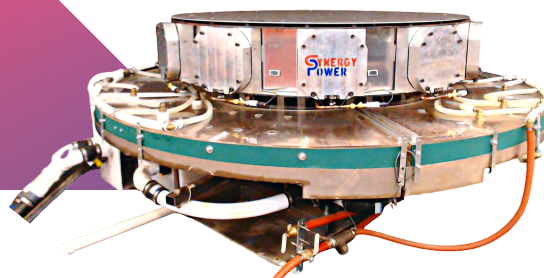

## The Applications

The applications are endless. Where there are temperature differences you can use the Synergine to produce power. The Synergine can be used in any industry or for personal use. The Synergine can be installed indoors or outdoors, as a single unit or multiple units linked together.

## The Benefits

The Synergine is a reliable and portable form of generating alternate energy. The Synergine can be fit into many scenarios, and can be shipped anywhere in the world to be used in any climate. The Synergine requires very low maintenance, it has a small physical footprint, and the Synergine is environmentally friendly.

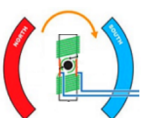

*The Synergine is a Thermal Gradient Motor and is the newest in a line of revolutionary motors and it works on basic principles with resources that are available everywhere.*
