

- The Synergine is a reliable and portable form of generating alternate energy.
- The Synergine can be fit into many scenarios.
- It can be used anywhere in the world.
- It can be installed and used in any climate.
- The Synergine requires very low maintenance.
- It has a small physical footprint.
- The Synergine is environmentally friendly.

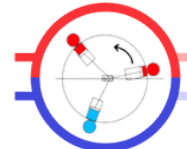

The Synergine is a Thermal Gradient Motor and is the newest in a line of revolutionary motors and it works on basic principles with resources that are available everywhere.

DC Motor

AC Motor

TG Motor

Emission Free Power  
From Any Heat Source

The Synergy Power Synergine is patented new thermodynamic technology that is changing the way people are thinking about power production and efficiency.

# SYNERGY POWER™

## Introducing The Synergine

Providing clean, affordable energy for everyone from low temperature heat sources available everywhere.

# SYNERGY POWER™

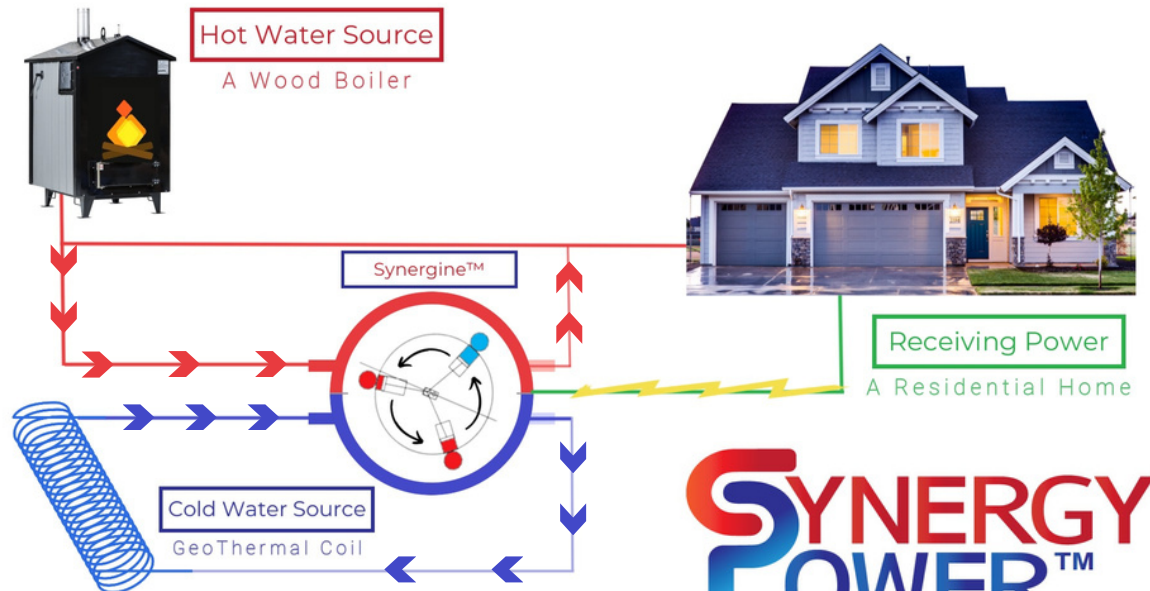

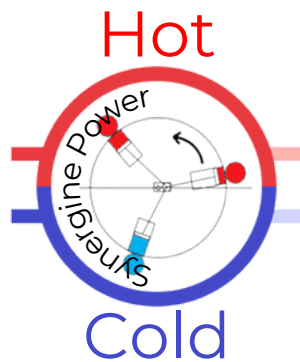

Where there are temperature differences you can use the Synergine to produce power.

According to [www.energy.gov](http://www.energy.gov) 1,200 Trillion BTU's of energy per year are being wasted.

With a Synergine this energy can be harvested and converted into electricity to be stored or reintroduced to electrical systems all over the world.

## Endless Applications

**SYNERGY  
POWER™**
